

# CC FixLock 1

Effective anti-theft protection of goods in ISO containers in connection with loading, unloading, warehousing and storage.

Approved by the Danish Insurance Association.

The CC FixLock 1 being fitted above the handle and pressed against the container door.

Control of the bolt clamp: Pull the bolt clamp to check that it is in locked position.

The CC FixLock 1 makes it impossible for anyone to turn the handle and open the container.

The CC FixLock 1 can be fastened to the locking bar for storage.

## CC FixLock 1

**It takes just a few seconds to achieve effective protection of goods in leased or shipper's own containers, as well as truck trailers with locking bars.**

**This also avoids unnecessary costs as the containers do not need to be modified.**

### Practical applications

The CC FixLock 1 was developed to safeguard container goods during loading, unloading and warehousing or for storage containers.

### Insurance approval

The CC FixLock 1 was awarded top-class approval for securing ISO standard containers by the Danish Insurance Association, in accordance with report no. 719.1/99.

[Distributor:](#)

### Technical description

Dimensions: (L x W x H) 200 mm x 100 mm x 50 mm.  
Weight: approx. 3.5 kg.  
In certain circumstances, the CC FixLock 1 may cause the container to exceed its standard size by 5 mm

The lock casing is produced in a sturdy U-shape, which is cemented after machining and surface treated with Rilsan.

The check pawl is cast in ductile graphite iron and subsequently galvanized. The pawl is attached to the lock casing using two hardened, electroplated steel pins.

The system comes with a hardened CISA lock, which is fitted with an SP 6+4-pin lock cylinder that is drillproof and cannot be picked.

### Patented key system

The patented key profile can only be supplied by a distributor authorized by Servial CC ApS. The key card enclosed with the product must be shown. This procedure safeguards against unauthorized copying of keys.

### Copyright

The CC FixLock 1 was developed by Servial CC ApS, and patent is pending.
